Airmove

Moving made easy: an on-demand delivery app streamlines logistics services with effortless booking and real-time tracking

Overview

AirMove is an on-demand logistics delivery app designed to provide secure, efficient, and convenient moving services for residential, commercial, and industrial customers.

Features At a Glance

- Vehicle Booking and Scheduling
- Real-Time Shipment Tracking
- Fare Estimation
- Secure Online Payments
- Driver and Customer Management
- Route Optimization with GPS

Project Impact

By streamlining booking, improving communication, and enhancing operational efficiency, AirMove increased flexibility, saving customers substantial amounts per move and significantly reducing logistics costs by 30%.

Cosmetic Choice

Beauty experts connected: how a consultation platform revolutionized health and wellness services
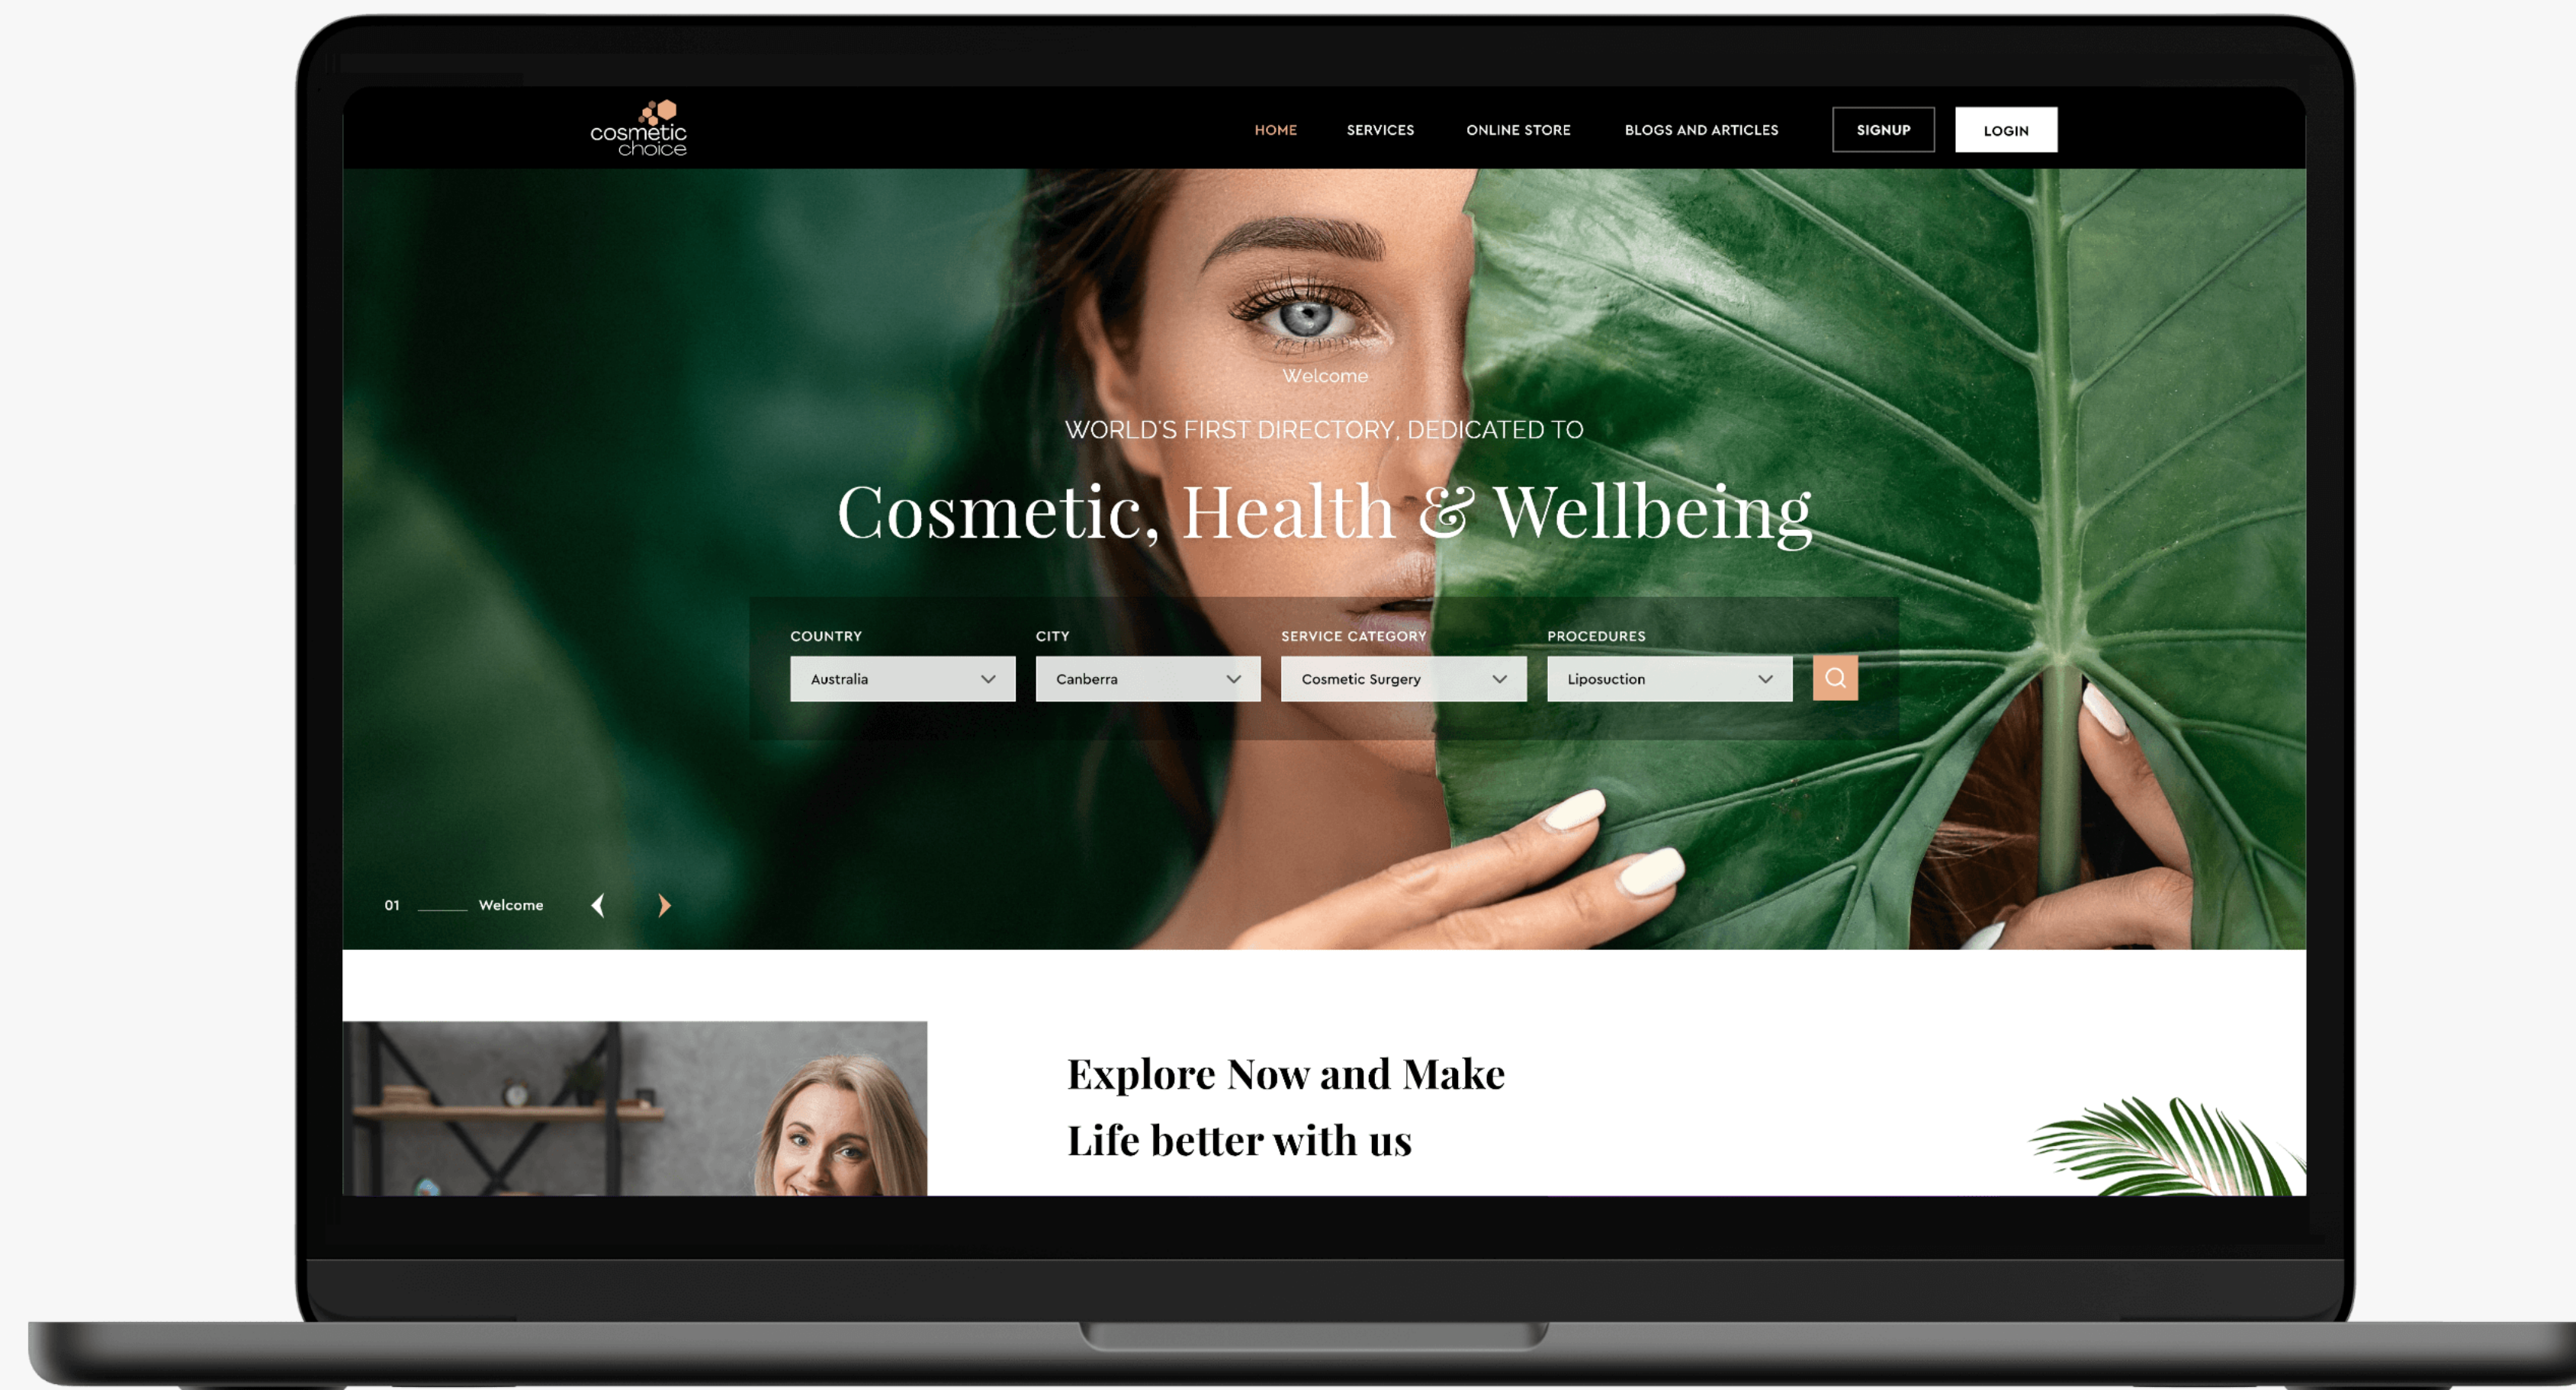

Overview

Cosmetic Choice is an online platform that connects clients with beauty, health, and wellbeing professionals through video consultations and in-person appointments, while also offering advertising opportunities.

Features At a Glance

- Video Consultations
- Instant Appointment Booking
- Comprehensive Service Listings
- User Reviews and Ratings
- Advertising Subscription Plans

Project Impact

By enabling 24/7 video consultations, instant booking, and comprehensive service listings, Cosmetic Choice connected thousands of clients with top professionals and boosted industry engagement significantly.

LiveDate

Next-gen dating app - over 100,000 chats made possible through innovative filters and live video features
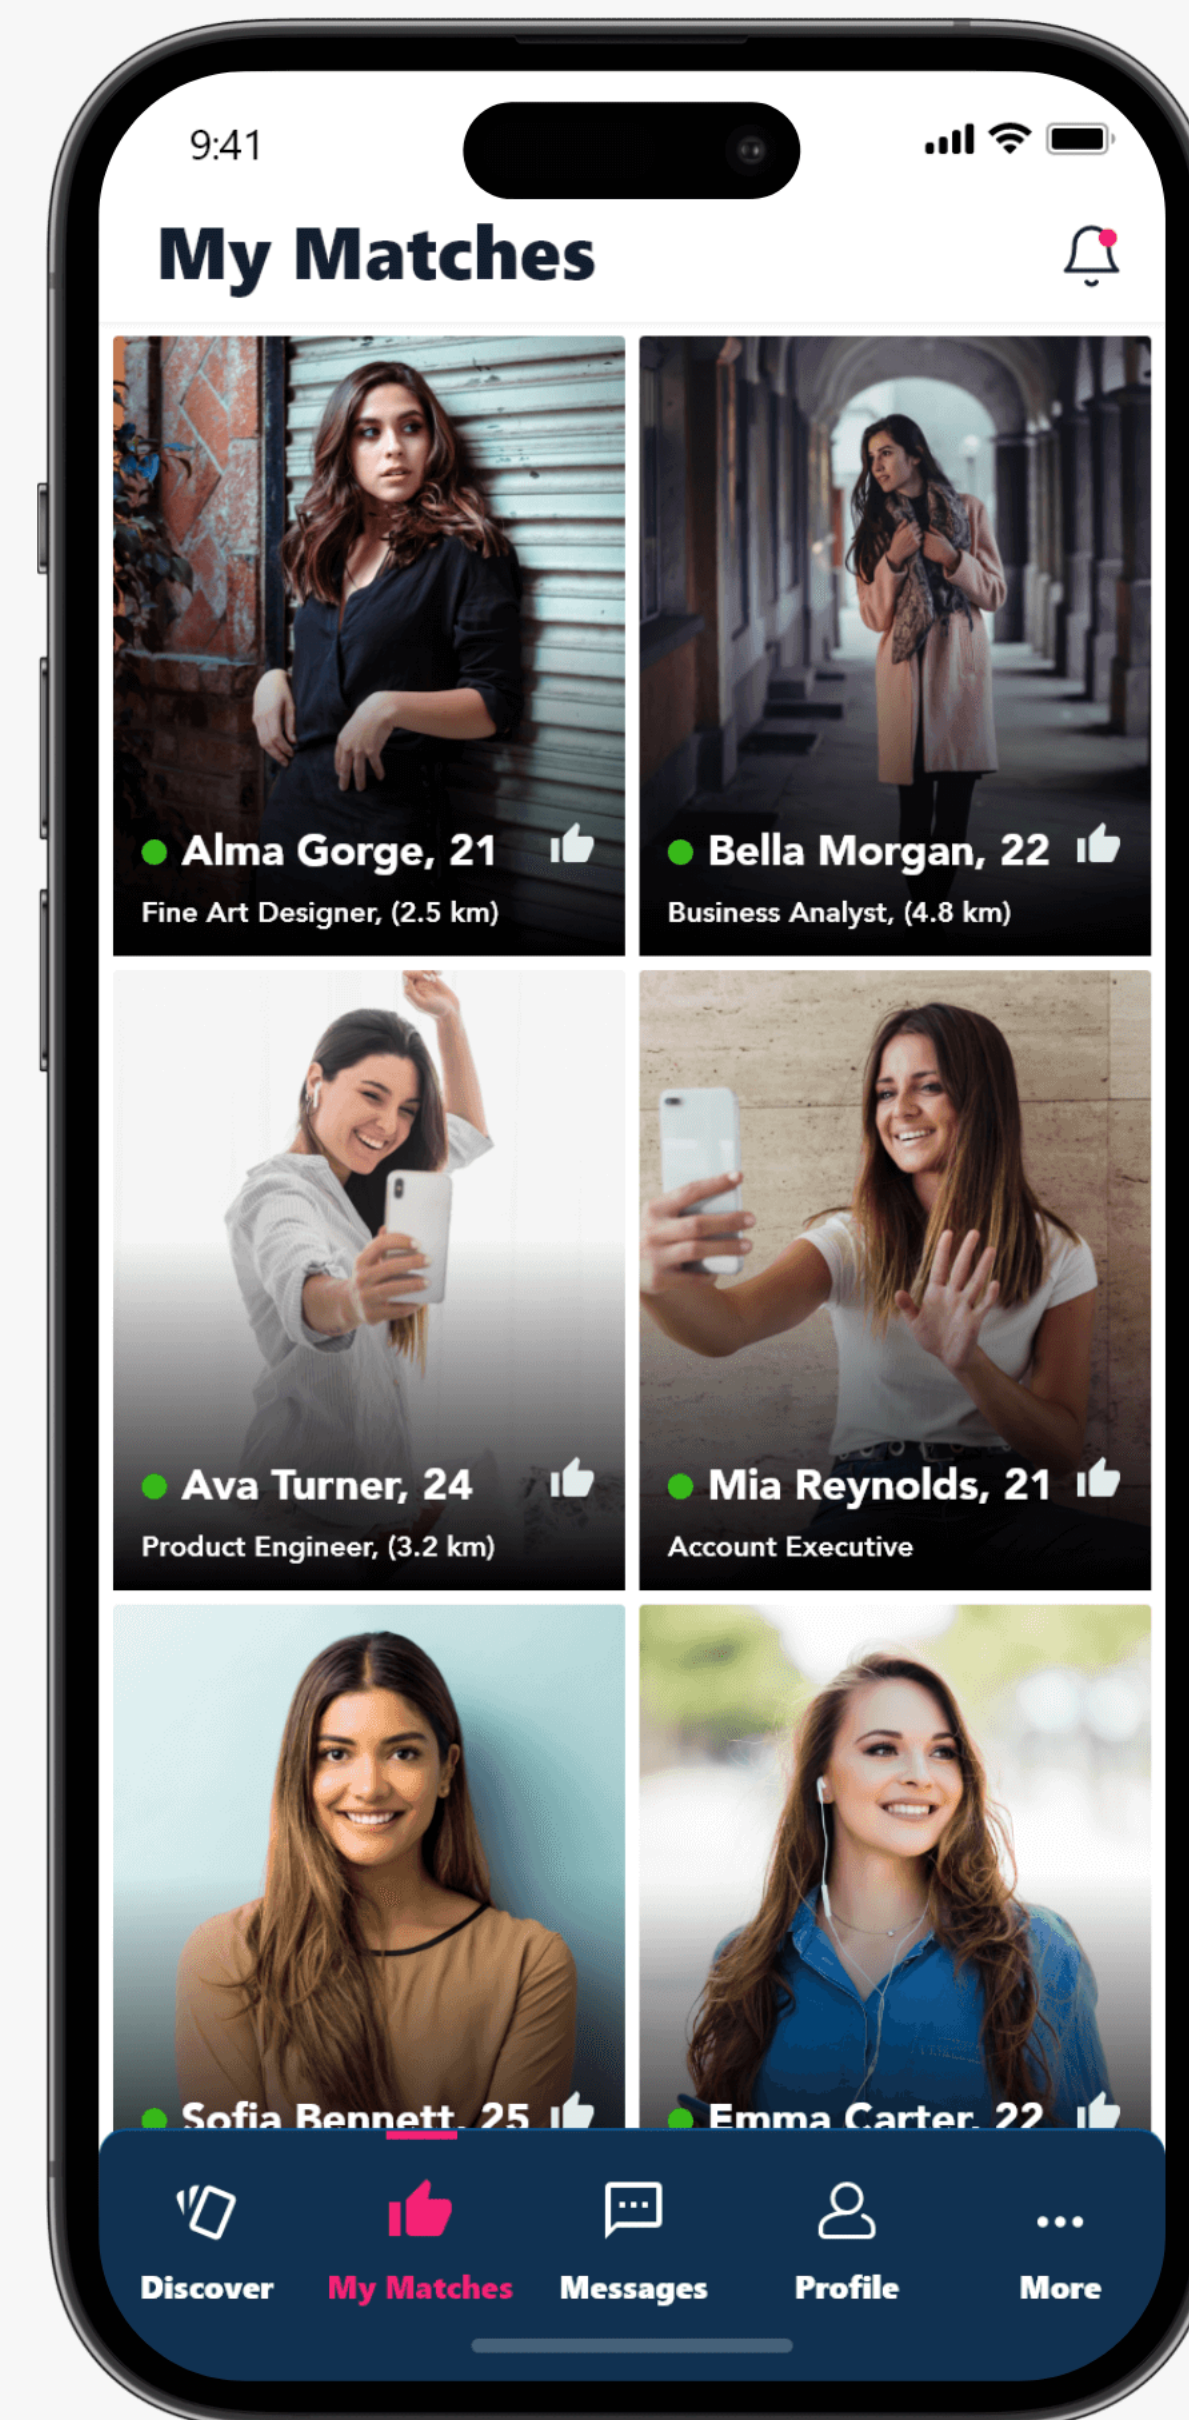

Overview

LiveDate is an online dating app designed to simplify finding romantic connections through easy browsing, live video chats, and personalized profile management. It streamlines the process of meeting and interacting with potential matches.

Features At a Glance

- Smart Matching Filters
- Live Video Chats
- Profile Management
- Membership Options
- Real-Time Notifications

Project Impact

By offering advanced matching filters and live video chats, LiveDate streamlined connections, facilitated over 100,000 chats, and enriched interactions, significantly enhancing the online dating experience.

Qwik Drop

Quicker than ever – how real-time tracking and seamless payments transformed delivery speed
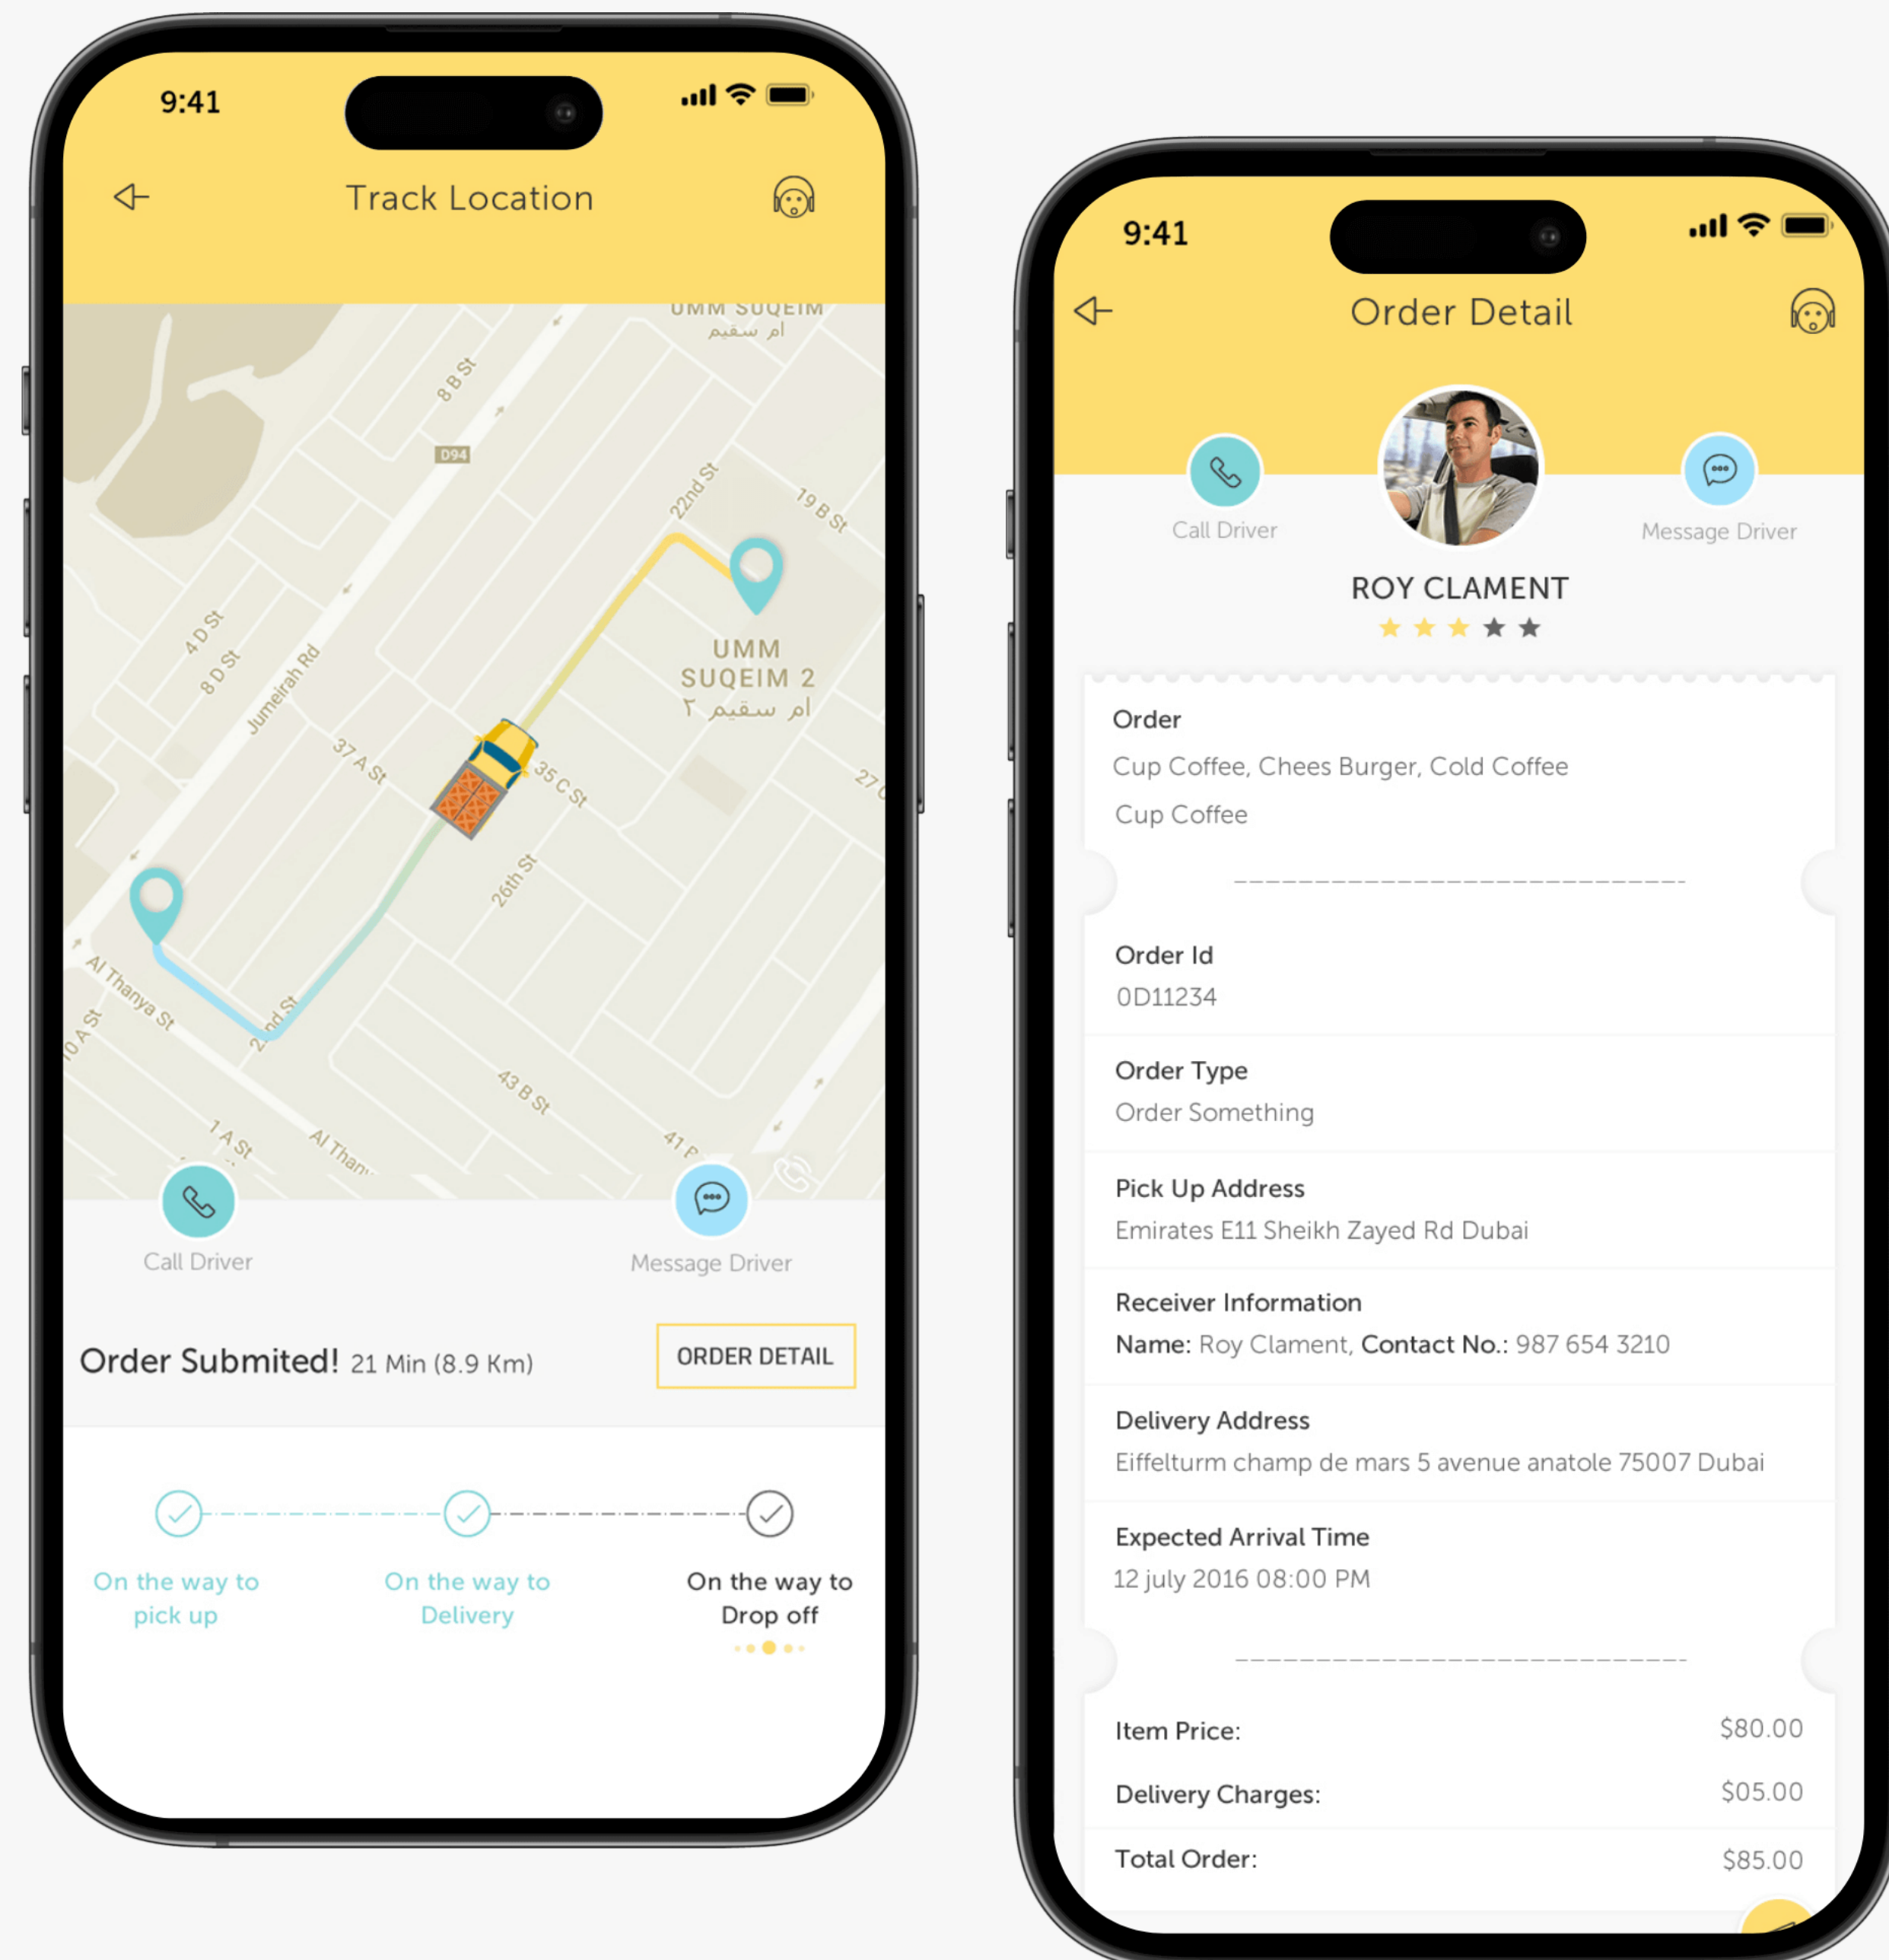

Overview

Qwik Drop is an on-demand delivery platform that connects merchants and individuals with crowd-sourced drivers to ensure local deliveries within minutes.

Features At a Glance

- Live Order Tracking
- Search Nearest Driver
- Integrated Payment Gateway
- Add to Cart
- Rating & Reviews

Project Impact

By offering live tracking, efficient payment integration, and rapid service, Qwik Drop cut delivery times in half, significantly enhancing local delivery convenience and user satisfaction.

Before & After Pro

Redesigning cosmetic progress: the effect of new editing and video capabilities in three months

Overview

Before & After Pro is a comprehensive photo editing app that empowers users to track and showcase their cosmetic transformations.

Features At a Glance

- Image Upload and Selection
- Advanced Editing Tools
- Video Creation from Transformations
- Collage Maker
- Premium Features for Enhanced Editing

Project Impact

Before & After Pro revolutionized cosmetic tracking with advanced editing and video features, resulting in a significant rise in user activity, 1000s of photos shared, and 100s of videos created in just 3 months.

Christian Dating

Innovative matchmaking - secure messaging and real-time video interactions enhanced the dating experience

Overview

Christian Dating is an app crafted for the Christian community, offering users quick matchmaking through live or recorded video chats.

Features At a Glance

- Verified Profiles
- Live Video Chats
- Personalized Filters
- Nearby Match Discovery
- Secure Messaging

Project Impact

The introduction of verified profiles and secure messaging on Christian Dating enhanced user trust and communication quality, leading to 15,000 successful connections and a more engaged community.

SolarHub

Solarhub is an online quoting platform that allows customers to select and customize quotes for solar and energy-efficient solutions.
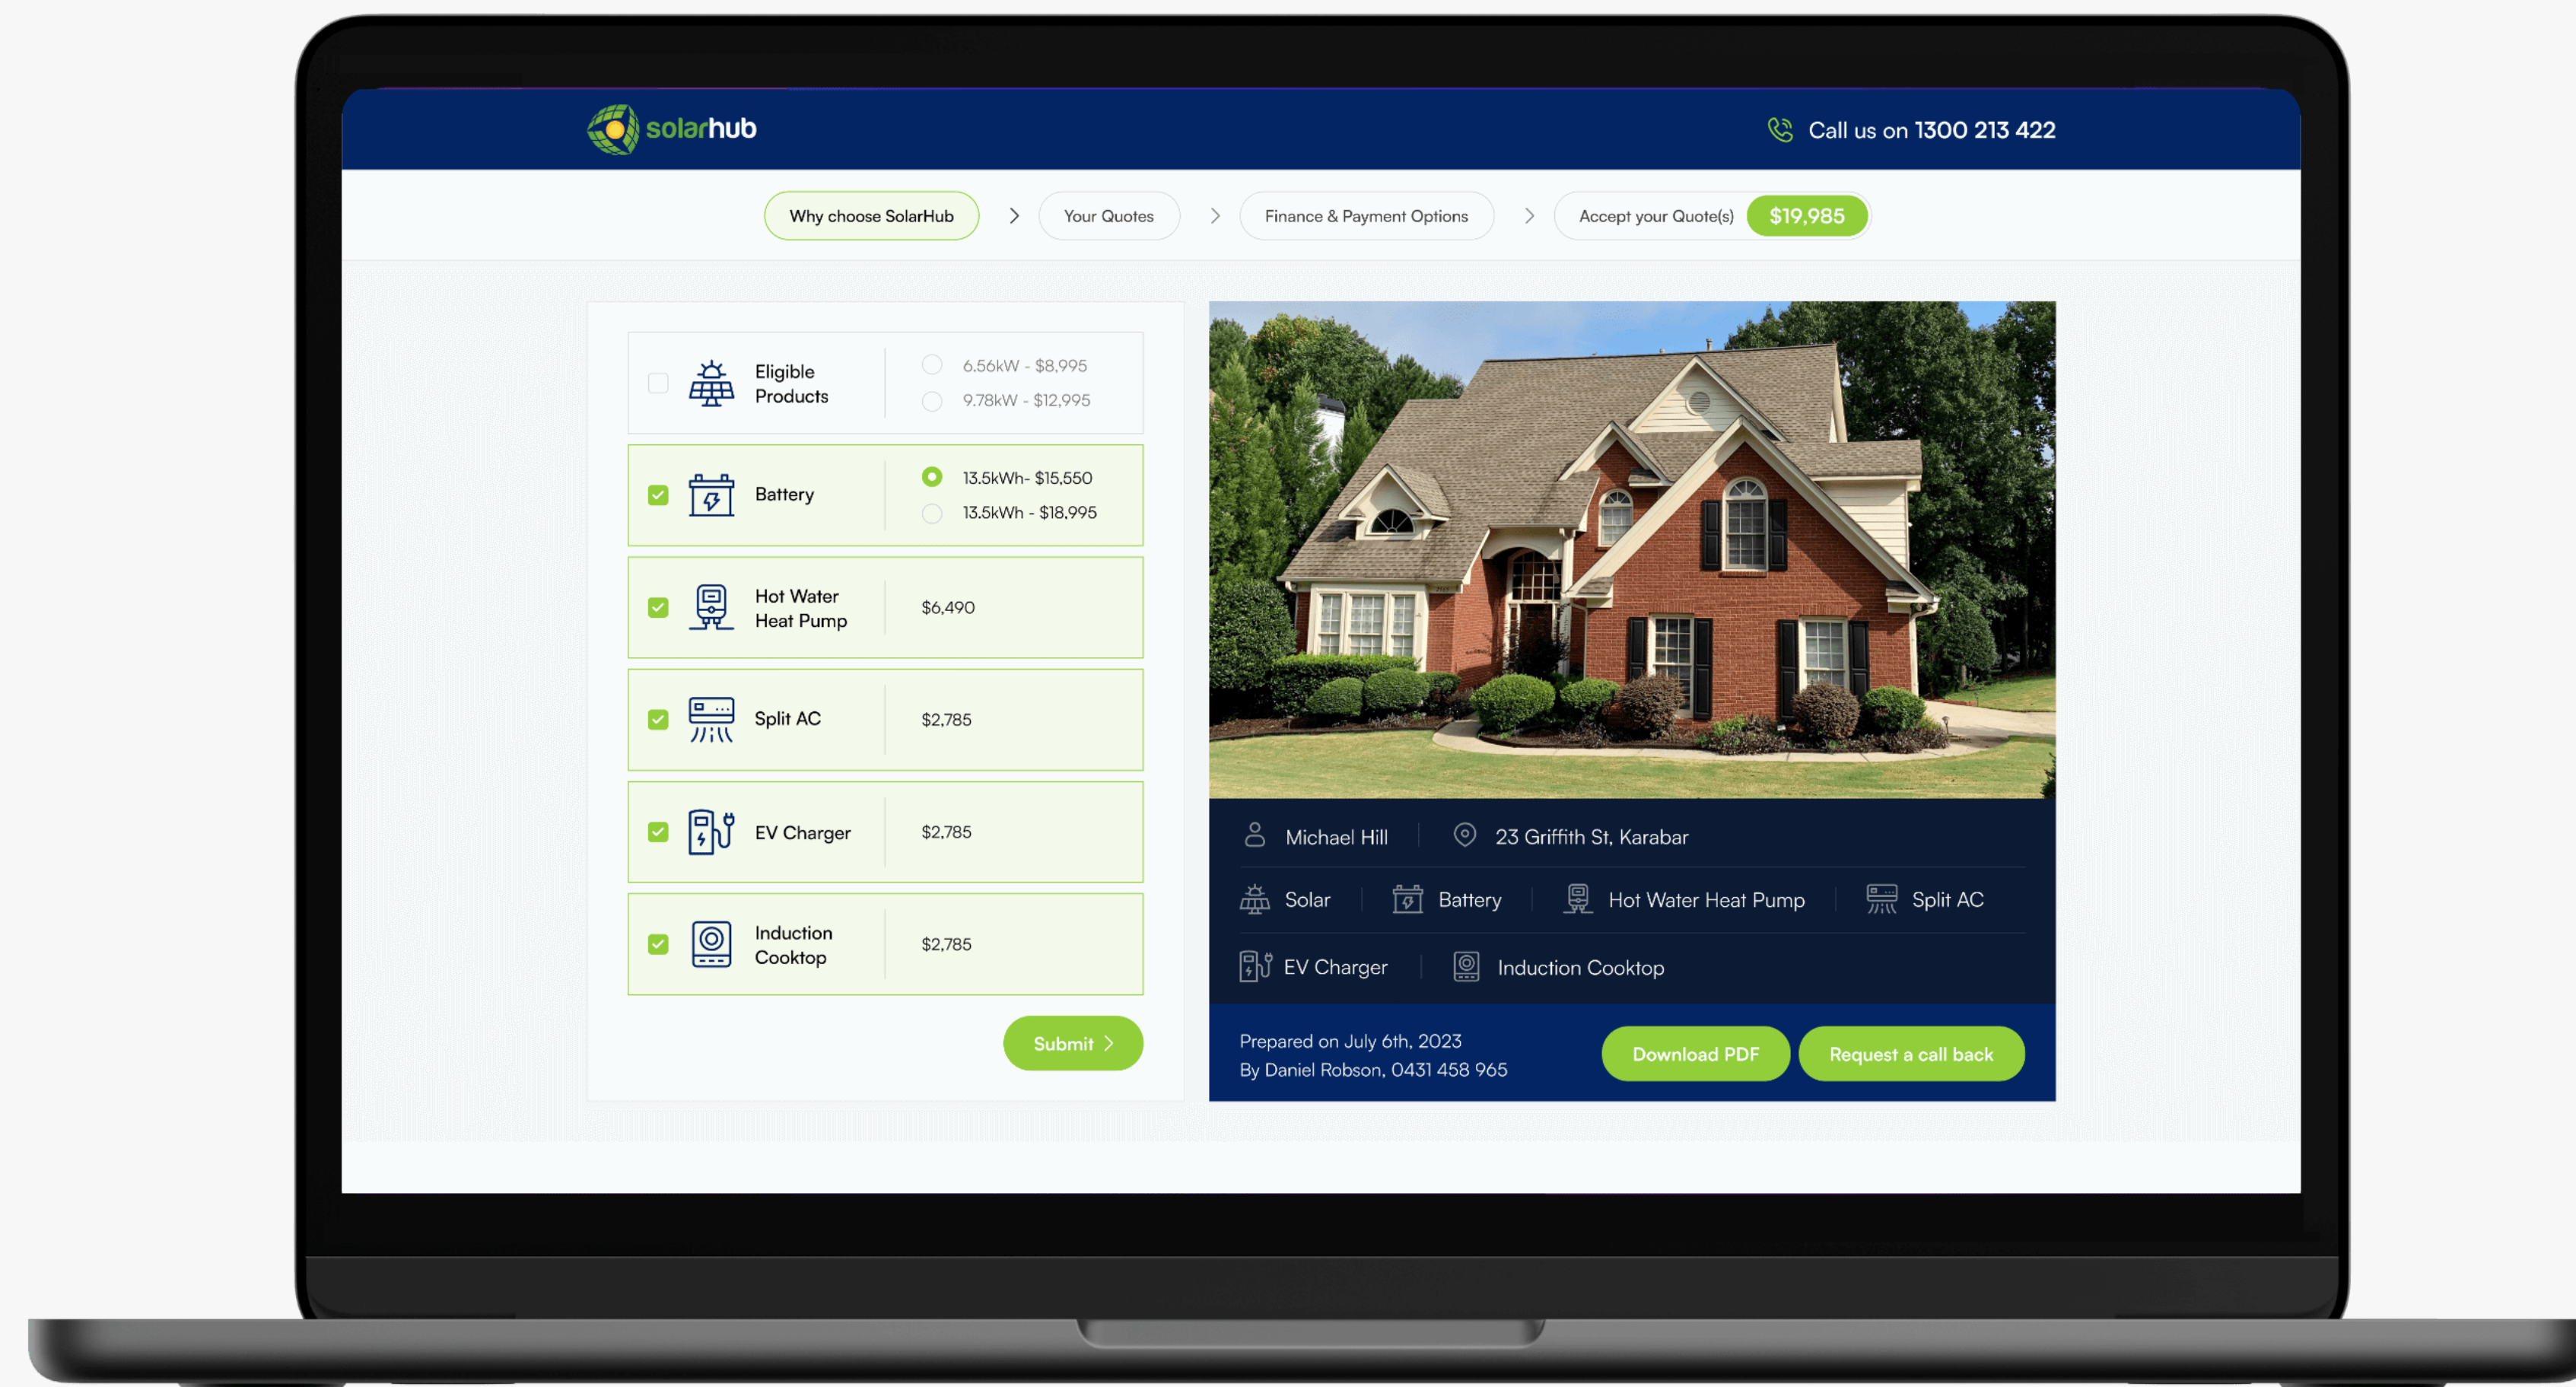

Overview

SolarHub is an online quoting platform that allows customers to select and customize quotes for solar and energy-efficient solutions.

Features At a Glance

- Customizable Quotes
- Online Finance Options
- Product Comparisons
- Customer Acceptance and Payment Integration
- Performance and Savings Estimates

Project Impact

With product comparisons and performance estimates, SolarHub enhanced customer experience, leading to 20,000 new users and speeding up the installation process by 2x.
